

**Watch Me Go (5-6)**

This exciting session introduces 5-6-year-olds to the wonders of motion and exploration. Through hands-on activities and creative play, campers will discover how things move in nature and use their energy to engage in fun challenges. They'll test their own abilities while learning about the forces that make the natural world go round.

**Nature Detectives (5-6)**

Budding investigators will uncover the secrets of the natural world. From tracking animals to examining clues like feathers and footprints, campers will sharpen their observational skills and solve nature-themed mysteries. They'll leave with a deeper appreciation for the small details that tell big stories about life outdoors.

**Art in Nature (5-6) (7-9) (10-12)**

Creativity meets the great outdoors in this artistic adventure. Campers will use natural materials to craft unique masterpieces while learning about the beauty and inspiration nature provides. Each session encourages self-expression and helps campers connect with the environment in meaningful ways.

**Survivor (5-6) (7-9) (10-12)**

Campers will learn essential outdoor survival skills like building shelters, navigating trails, and identifying edible plants in a fun, age-appropriate way. They'll practice teamwork and problem-solving while facing exciting challenges inspired by wilderness survival. This session is perfect for adventurous spirits and budding explorers!

**Aqua Adventure (5-6)**

Dive into a watery world of discovery! Campers will explore the fascinating habitats of aquatic creatures, engage in water-based experiments, and enjoy splash-worthy activities. This session combines fun and learning to deepen an appreciation for water ecosystems.

**Animal Caretakers (7-9) (10-12)**

Get hands-on experience caring for animals while learning about their habits, habitats, and importance to ecosystems. Campers will participate in feeding, cleaning, and observation tasks that help build compassion and understanding. It's the perfect program for young animal enthusiasts!

**Ew, Gross! (7-9)**

Dive into the slimy, squishy, and totally gross side of nature in this hands-on, messy adventure. Campers will explore mud and scum, make slime, and even dissect owl pellets to uncover fascinating surprises. This session is perfect for kids who aren't afraid to get their hands dirty while discovering the amazing and sometimes gross world of nature!

**Forest Discovery (7-9) (10-12)**

Campers will venture into the woods to uncover its hidden treasures. From tree identification to observing wildlife, this program sparks curiosity and a deeper appreciation for forests. Each adventure will highlight the vital role forests play in maintaining Earth's balance.

### **Decomposers (7-9) (10-12)**

Learn about the unsung heroes of the ecosystem! Campers will dive into the world of fungi, insects, and bacteria, discovering how they break down organic matter and recycle nutrients. This session highlights the interconnectedness of all living things and the importance of nature's recyclers.

### **Get Lost! (7-9)**

Campers will put their navigation skills to the test! From reading maps to using compasses, they'll gain confidence in finding their way through the great outdoors. Along the way, they'll develop problem-solving skills and a sense of independence.

### **Games, Games, Games (7-9)**

This session is packed with action! Campers will enjoy outdoor games that promote teamwork, strategy, and physical activity while having loads of fun. Each game offers opportunities to build friendships and develop new skills in a playful environment.

### **Space Adventure (10-12)**

Blast off into a session that's out of this world! Campers will explore the mysteries of the universe, from stars and planets to the science of space exploration. With engaging activities and exciting discoveries, they'll come away inspired by the vastness of space.

### **Adaptations (10-12)**

Discover the incredible ways animals and plants have adapted to survive and thrive in their environments. Campers will explore topics like camouflage, specialized diets, and survival strategies through engaging activities and close observation. This session offers a deep dive into the ingenious mechanisms of nature's design.

### **Slimy & Scaly (5-6)**

Get up close with creatures that slither, crawl, and slide! Campers will learn about reptiles and amphibians, discovering what makes these slimy and scaly animals so unique. Hands-on encounters and playful activities will help spark a lifelong curiosity about these fascinating creatures.

### **Adaptations (5-6)**

Explore how animals and plants change and adapt to their surroundings. Through fun, age-appropriate activities, campers will uncover the secrets of nature's survival tools like camouflage and specialized senses. This session encourages curiosity and builds appreciation for the wonders of the natural world.

### **Habitats (5-6)**

Take a journey through the diverse homes of animals and plants! Campers will learn about forests, ponds, and meadows and the creatures that live in them. With games and interactive lessons, they'll discover what makes each habitat special and how we can protect them.
